

EDUCATION

Pillai HOC College of Engineering

(Affiliated with University of Mumbai)

CGPA – 6.91

Bachelor's of Engineering in Electronics and Computer Science

2024-2027

SKILLS SUMMARY

- Languages : Python, Javascript
- Frontend/Backend: Fast API, Node.js, React, Tailwind CSS, REST API, Django
- AI/ML Tools: PyTorch, Langchain
- Python Libraries :- OpenCV, Pydantic, Yolo V-8, Pandas, Numpy, Matplotlib
- Databases :- NeonDB, MongoDB, Postgres, SQL
- Deployments :- Vercel, Render

ACHIEVEMENTS

1st Place – 24hr International Hackathon

[Github](#) | [LinkedIn-Post](#)

- Led a team of 4; built TeleHealth platform in 24 hrs.
- Developed Remote Consultations, Digital Health Records, AI symptom guidance, and pharmacy search optimized for low-bandwidth networks.

PROJECTS

Rural Care - Telemedicine Platform

[Live Demo](#) | [Github](#)

An AI-powered telemedicine platform that improves healthcare access in rural areas by enabling online consultations, AI-based diagnostics, and medicine availability tracking.

- Developed real-time video consultation using WebRTC for seamless doctor-patient interaction.
- Developed AI symptom checker for preliminary health insights.
- Implemented a medicine search system with live pharmacy inventory tracking and availability insights.

BrainTrack – Smart Study Tracker

[Live Demo](#) | [Github](#)

A productivity-focused study tracker that helps students organize study sessions, manage tasks, and monitor learning progress through interactive analytics and a integrated productivity toolkit.

- Built an interactive productivity dashboard featuring a floating Pomodoro timer, task management, calendar, notes, and subject-wise study tracking.
- Implemented progress analytics, streak tracking, daily goals, and weekly insights to help students visualize learning consistency and improve productivity.

AI Resume Analyzer – Intelligent Resume Evaluation Platform

[Live Demo](#) | [Github](#)

An AI-powered resume analysis platform that evaluates resumes against job descriptions, provides ATS compatibility scores, and generates personalized feedback to help job seekers improve their chances of securing interviews.

- Built an AI-driven resume evaluation system that analyzes uploaded resumes, calculates ATS scores, identifies missing keywords, and provides actionable improvement suggestions.
- Implemented resume upload, secure storage, job description matching, and automated AI-powered feedback with an intuitive, responsive user interface.

CERTIFICATES

1. Become Experts in Python | (Udemy)
